This foundational course offers a thorough understanding of workplace health and safety. It focuses on practical solutions to common workplace hazards and helps organizations meet their legal and ethical obligations.

Who Should Attend:

- New employees requiring basic health and safety awareness.
- Line managers and supervisors.
- Organizations aiming to build a solid health and safety foundation.

Learning objectives:

- Define the concept of workplace wellbeing and its importance.
- Explore six key elements of workplace wellbeing: Leadership, Job Design, Mental Health, Physical Environment, Social Interactions, and Health Interventions.
- Identify the challenges and barriers to implementing wellbeing programs.
- Learn evidence-based approaches to improve workplace wellbeing.
- Develop a simple action plan to integrate wellbeing initiatives in your workplace.

Certification:

Participants complete a multiple-choice exam and a practical workplace risk assessment project. A NEBOSH certificate is awarded upon successful completion.

Registration

Government establishments:

Institute of Public Administration will receive the nominated candidates for registration from authorized training specialist through the registration system (TMS) available on the website: (www.ipa.gov.bh)

Private establishments and Individuals:
